More ways to create AR

Studio

Create 2D and 3D experience with our powerful AR-first engine.

Universal AR

Power up your favourite frameworks and engines with our AR SDKs.

Designer (legacy)

Image tracked experiences using images, video and audio.

Widgets (legacy)

Templated AR experiences tracked to a zapcode.

Kies vervolgens hoe studenten toegang krijgen tot het project - QR-code, deep link of Zapcode (verschillende projecttypen kunnen verschillende triggers hebben).

Select a trigger

A trigger is an entry point that will allow end users to launch your AR experience. Projects may have multiple triggers for the same experience. [Learn more.](#)

Triggers

-  **QR code** Simple to use and popular across the world. Scanning the QR launches your AR experience in browser with WebAR.
-  **Deep link** Deep links allows users to launch an experience without first having to scan a zapcode. Useful for non-imaged tracked experiences launched from an app or mobile web.
-  **Zapcode** Zapcodes can be scanned using the free to download Zappar app. Simply point and scan and the user will be able to enjoy your content.

Geef uw project een naam.
