First contact with the device Meta Quest 2 – v1

Below, you will be able to understand what you will find when you open the packaging of Meta Quest 2 and how you will have to adapt the various equipment in order to start the immersive experiences correctly.

Official Introduction link [HERE](#).

What we'll find

1. Packaging and contents

This is the unopened package containing all the equipment that has to be opened, as shown in the following pictures.

mafea.eu

MaFEA – Making Future Education Accessible

Inside we will find the following equipment:

Virtual Reality Glasses

Commands

How to adapt the equipment correctly

Official setup link [HERE](#).

1. Commands

You must remove from each control, the safety tab that prevents the batteries (already included) from being correctly connected to the controls.

2. Protections and Adapters

Those wearing glasses should fit the respective adapter. The two adapters should be inserted into the glasses carefully. Finally, to protect the sponge of the adapter and for the sake of comfort, it is covered with a silicone film.

3. Head restraints

The support is fitted to the sides and the upper strap can be adapted (using velcro) to the size of the User's head.

4. Lens

Apart from removing the protective film, the width between the two lenses can be adapted to the User's needs.

Official link to lens fitting [HERE](#).

Complements

1. Storage box

To safely store and transport all the equipment, the brand provides this box with a handle.

2. Head support

Besides the strap which comes with the equipment and allows you to fit and fix in a safe, stable and comfortable way the glasses to each head, this complementary support is very structured, allowing the "tightening" to be done immediately through a pulley positioned on the side. The upper band allows the correct fixation to the size of the User's head.

How to store the equipment correctly

First the controls should be placed inside the packaging and only then the glasses and the charger in the side section, as shown in the following pictures.
