Complements

There are many accessories for the Meta Quest Pro device. Here is what we were able to use too.

1. Storage box

To safely store and transport all the equipment, it is recommended to get this box with a handle.

How to store the equipment correctly

The protector should be placed on the headset, before putting the headset in the case and only then the controllers and the charger in the center section, as shown in the following pictures. The charging station and cables can should be stored in the pockets available to avoid scratching the headset lenses.
